

Floor Standing Server Cabinets

Complete Server Cabinet Solutions

Pre-Installed with all the basic accessories you need

- 2 or 4 WAY ROOF FAN UNIT
- FIXED SHELF
- CASTORS & LEVELING FEET
- BAG OF NUTS & SCREWS
- VERTICAL FRONT CABLE MANAGEMENT for 800mm Cabinets

Offering excellent quality coupled with value for money, the new ETL Networks Server Enclosure range is ideal for your IT installation, no matter how big or small.

Designed to exacting standards, the Server Enclosure range offer total Server and high valued IT device containment coupled with ease of installation and post maintenance. Used throughout both Public and Private Sector installations across the UK and Europe, they feature genuine useful features including superior hot air venting (both passive and active), heavy duty vertical uprights both front and back which can be fully adjusted and multiple cable entry points for correct cable placement. Using Universal mount system means that almost any Server, 19" Network device, Telco/PBX device and of course passive patching systems can quickly be added as and when it is needed. Using the standard 600mm(w) X 1000mm(d) design, the Enclosure is also available as a 800mm(w) X 1000mm(d) design for installations that require more space for cable patching etc.

Main Features:
