

HDMI-HDMI 1.4 Cables

Premium Quality for a Richer Picture and Sound

Get the perfect image. For less.

Are you looking to get the very most out of your latest Hi-Definition 3D LED/Plasma TV and BluRay™ setup but are put off due to the high cost of the HDMI connecting cables? Are you looking to extend your current HDMI cables or upgrade to the latest HDMI 1.4 specification?

Introducing the latest HDMI 1.4 specification cables from ETL Networks. Offering not only the latest, high-speed connection rates of up to 8Gbps*, high-speed Ethernet which allows up to 100Mbps to be transmitted through the HDMI cable, thus removing the need for separate data cables from say the TV and the Home Theatre system together with Audio Return Channel (ARC) which again means Audio signals can again be sent concurrently through this highquality HDMI cable, again reducing separate cable clutter.

Available now in multiple lengths to suit your application.
