High-Performance SVGA Video Connection Cable Solutions

Are you looking for a high-quality VGA/SVGA signal cable at a competitive price for your display peripherals?

The new range of ETL Networks SVGA Male to Male signal cables are the ideal partner for your existing computer, signage and broadcast A/V displays. Ideal for commercial, educational and retail users looking for both quality and a low price point, across the range.

Although competitively priced, quality is not compromised. Take for example our high-quality double screened design which reduces external RF noise so to give you a clearer SVGA display, even at extended distances.

Not forgetting our robust and durable moulded 15-pin over plug design and secure thumb screw locking system, keeping everything connected - even in challenging environments.

## specifications:
