RJ45/12 CONTINUITY TESTER – 2 PART

PART NUMBER – CH2507

This RJ45 Cable Tester can be applied in testing not only UTP and shield RJ45 cat5e cat6 cat6a cable, but also RJ11 RJ12 telephone lines. The package contains 1pcs Network Cable Tester (battery not included, requires 1pcs 9V 6F22 battery) 【Automatic Operation】 Inserting the cables, this cable tester will run automatically, the LED light will display the status, and any troubleshoots such as the short circuit, open circuit, and the cross line can be found rapidly and easily. 【Can Be Tested Remotely】 Our network cable tester is convenient to hold in hand for its mini size and it comes apart: master unit and remote unit. So you can test even when the cable's ends are in different places, as long as the distance is within the limited circle of about 100 meters. 【Gold-plated Shielded Socket】 This cable tester uses a gold-plated shielded socket, which will not rust, has stronger oxidation resistance, is more resistant to plugging, and has a longer service life. 【Durable and Sturdy】 The outer shell of our network cable tester is made of environmentally friendly resin, which has drop resistance and durability. Our newly lighting emitting diodes are conducive to distinguishing clearly and quickly positions of wrongly-configured wires.
